

LINEA

Nabucco

La linea Nabucco mette insieme due applicazioni quali apparecchio a parete ed apparecchio per testa-palo. I materiali sono riflettore in rame successivamente anticato e diffusore in vetro temprato trasparente. L'apparecchio per testa-palo va invece accessorato con pali e/o con l'interrato presenti da pagina 642 a pagina 650 del catalogo, da ordinare a parte. E' un insieme d'effetto che diventa inconfondibile elemento d'arredo per giardini, viali, borghi antichi e ristrutturazioni.

The Nabucco collection brings together two applications like wall fitting and pole head fitting. Materials are: copper shade, subsequently aged, tempered clear glass. The fitting for pole head should instead be customized with poles and / or with basements present from page 642 on page 650 of this catalogue, to be ordered separately. It naturally integrates with gardens, avenues, ancient villages or renovations.
